

A Note Regarding Diving Well Area for all meets:

In the interest of safety for our student athletes the diving well must be properly prepared for all diving events, including warmup times. The diagram below indicated the “minimum” areas need to safely conduct the diving event; ***this includes removing all backstroke flags and the adjustments of any swim lane ropes that may interfere with the diver’s ability to safely perform any dive.*** Please work with the facility/pool manager/management to request any adjustments to the pool equipment as necessary.
